Experience

Frontend Web Developer

Collaborative Project - Remote | April 2025

- Engineered a fully functional e-commerce platform from scratch, utilizing full-stack development techniques to deliver a seamless user experience within a two-month timeframe.
- Implemented SMTP, role-based middleware for buyer/seller access, and developed UI components including admin store approval, login, about us, product card, and payment gateway pages.

Frontend Web Developer (Thesis Project)

Your Road - Emilio Aguinaldo College Cavite | Jan 2025 - May 2025

- Built a real-time road navigation app prototype as part of a thesis project.
- Implemented the front-end UI, integrated SMTP for alerts, and added middleware for role-based access.

Frontend Web Developer (Intern)

KBlink.ph - Hybrid | June 2024 - July 2024

- Collaborated with a team to build an eCommerce website for the company using React, Tailwind CSS, and Firebase.
- Handled various UI implementation tasks across multiple pages and components, ensuring responsive design and seamless user experience.
